## Lithium Non-Rechargeable (Coin Cells)

Detailed product specifications are available on: [us.100y.com.tw](http://us.100y.com.tw)

CR 2450CN

Cr2477

### CR 2477 specification

- Nominal voltage (V): 3
- Nominal capacity (mAh): 950
- Continuous standard load (mA): 0.2
- Operating temperature (C): -20~+60
- Standard Weight: 10.5g

### Q & A for Battery

Do warm and cold temperatures affect batteries?  
 Extreme heat or cold reduces battery performance. Avoid putting battery-powered devices in very warm places. In addition, refrigeration is not necessary or recommended. Store batteries at room temperature in dry environment.

### CR-1/3N-1BP(N)

- Drawing on SANYO's advanced technologies, these lithium photo batteries deliver high voltages and a greater energy density. An exceptionally long life and stable characteristics ensure that your perfect shot is never lost due to weak batteries.
- The lower internal resistance of these batteries considerably improves discharge capabilities, resulting in impressive low-temperature characteristics.

Structure

- There is truly an astonishing range of battery-powered appliances available today, in the wake of which has followed a demand to cover unanticipated range from super light duty to super heavy duty. Technological innovations in Toshiba SUPER HEAVY DUTY batteries have more than kept pace with this demand, allowing us to produce batteries perfectly suited for handling such wide drain range that are so common today. Naturally, Toshiba SUPER HEAVY DUTY batteries deliver satisfactory performance in general purpose applications as well.
- New manufacturing technology has made it possible to increase the density of the positive mixture, resulting in a significant boost in the reaction rate of the positive active material.
- Another major technological innovation in Toshiba batteries is a special separator of low impedance and high chemical and physical stability, gives the batteries an extremely high output rating. You will find them ideal for equipment requiring high current flow, and equally suited in electronic applications requiring small current pulses use.
- New advances in manufacturing technology realized the use of new, special sealing construction and highly airtight sealant, resulting in further improving of shelf life.
- No mercury or cadmium is added.
