THERMAX_ Coaxial Cable

Detailed product specifications are available on: us.100y.com.tw

DESCRIPTION:

Thermax/CDT Mil-C-17 Cables are constructed with either solid or stranded silver plated conductors insulated with an extruded PTFE (polytetrafluoroethylene) dielectric. The outstanding electrical and mechanical properties of PTFE over a broad range of temperatures and frequencies make these Thermax/CDT coaxial cables the standard for a wide range of military and commercial applications.

DESCRIPTION:

MaxForm cable is a hand-formable alternative to semi-rigid cable which its 100% shield coverage, it provides equivalent performance to MIL-C-17 semi-rigid, but can be formed by hand without the use of bending equipment. Cable assemblies can be made to approximate overall length and bent to fit when installing into equipment. MaxForm cable can be used with connected designed for MIL-C-17 semirigid cable with no change in assembly procedures.
