Aluminum Electrolytic Capacitors Screw Terminal Standard Large Can Capacitors

The type 101C is the wide-temperature, low voltage version of the type 550C, It is ideal for high ripple current military and industrial applications that need full performance to -40°C and solid performance to -55°C, It also excels as a power-supply output capacitor because of its exceptionally low ESR. The extended cathode foil of the 101C assures heat flow from the capacitor element to the can in all mounting orientations
