| 3664 | 1055B | 3mm Wire Ended Neon Lamp | 12 |

Filament lamps will perform to specification and give optimum life when:

- they are powered at the rated voltage from a
- stabilised 50 Hz ac supply
- ambient temperature is in the range 20°C to 25°C
- no mechanical vibration is present.

Deviation from these standards can have a significant effect on lamp life, particularly with low current filaments (<80mA)
Operation from a dc supply at the rated voltage can reduce specified life by up to 50%
