Main Features:

- The specially structured brush virtually eliminates volatilization in the flux. As a result, the concentration of the flux remains constant throughout use.
- A special packing contained within the cap to which the brush is attached prevents leakage of flux keeping the area around the workbench neat and clean.

For Post-Mounting Applications for Surface Mount Devices such as:

- Post-mounting of connectors
- Applications of cleaning alcohol
- Application of silicon oil on precision mechanical chassis
- Dispensing of various solvents
