3236	ALS107/+5	"+" Screwdriver		125mm	6mm

Put one of these wonderful screwdrivers in your hand and feel the comfort, grip, and increase the amount of torque on your fasteners. The Ergotwist® screwdriver handle is bonded in a multi-step process using two different materials! The shank is surrounded by dark-grey cellulose acetate that's round and smooth to rotate easily in the palm without blistering your hand. The red "comfort zone" has a newly developed thermoplastic elastomer that provides comfort and grip even if your hands are a little oily. There are two ways to hold a screwdriver. For pretightening, you hold it one way, for maximum torquing you hold it another. Other manufacturers fail to take this simple design issue into account!

These feel great in either mode! Set of five Pozidrive® heads includes 0x75, 1x100, 2x125, 3x150, and 4x200. Enjoy!

Part No.	Product No.	Manufacturer	Description	Working length	Length
2604	AZP.0*75	FACOM	"+" Screwdriver	75mm	4mm
2605	AZP.1*75	FACOM	"+" Screwdriver	75mm	5mm
