## Rules

### FEATURES

- Three measuring heads are attached to the stainless steel rule (blade), allowing versatile measurements on various types of workpieces.
- Square head — Used to set the rule at 90 degrees or 45 degrees to an edge of a workpiece.
- Center head — Used to locate centers of round workpieces.
- Protractor head — Used to set the rule at a desired angle to an edge of a workpiece. Also used for measuring angles.
- The measuring heads are hardened.
- Economy sets not including a protractor head are also available.
