## Digital Micron Indicators & Dial Indicator

Detailed product specifications are available on: [us.100y.com.tw](http://us.100y.com.tw)

Series 2 dial indicators are Mitutoyo's most popular, and have the widest application. Especially the "one revolution" dial indicator is developed for in-process measuring. This indicator features a hand that makes only one revolution throughout the entire spindle range. This prevents costly measuring errors made with indicators whose hands make as many as 2 - 1/2 revolutions.
